

SENTHIL KUMAR C

Senior Software Engineer | Data Migration Specialist | Database Engineer

Chennai, Tamil Nadu, India

senthilsk03@gmail.com | +91-9789295013 | [in LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 3+ years of experience specializing in data migration, ETL pipeline development, SQL query optimization, and database engineering. Proven expertise in SQL Server, MySQL, T-SQL, SSIS, and SSMA with a consistent track record of delivering zero-data-loss migrations, high-performance stored procedures, and scalable data solutions at enterprise scale. Experienced in leading junior engineers, managing Jira-tracked deliverables, and maintaining version-controlled SQL scripts via Bitbucket. Currently supporting ChitCore, a live production chit fund management ERP serving 150+ RDLC reports across modules including customer, agent, branch, group, chit, ledger, receipts, and legal operations.

TECHNICAL SKILLS

ETL & Data Migration: SSIS (SQL Server Integration Services), SSMA (SQL Server Migration Assistant), Data Pipelines, Data Mapping, Data Transformation, ETL Automation, MySQL-to-SQL Server Migration, SQL-to-SQL Migration

Database Technologies: SQL Server, MySQL, T-SQL, Database Design, Schema Design, Query Optimization, Stored Procedures (SP), Indexing, Data Modeling, Insert Scripts, Update Scripts, Script Version Control

Programming Languages: C#, SQL, T-SQL, JavaScript

Frameworks & Tools: .NET Framework, ASP.NET, RDLC Reports, Visual Studio, SQL Server Management Studio (SSMS), Bitbucket (Push/Pull), Jira

Business Intelligence: SSRS (SQL Server Reporting Services), SSAS (SQL Server Analysis Services), Power BI, KPI Reporting, Dashboard Development

Methodologies: Data Validation, UAT Testing, SQL Script Review, Insert/Update SP Code Review, Jira Ticket Management, Deadline-Driven Delivery

Domains: Chit Fund Management ERP, Financial Applications, Enterprise Data Warehousing, Multi-branch Operations, Subscription & Auction Management

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Novac Technology Solutions

April 2026 – Present

Chennai, Tamil Nadu

- Serving as the dedicated database and reporting engineer for **ChitCore**, a live chit fund management ERP in production since May 2026; designed, developed, and delivered 150+ RDLC reports across modules: Customer, Agent, Branch, Group, Ticket, Chit, Legal, ROC Receipt, Receipt, and Ledger
- Designing, writing, and optimizing SQL Server stored procedures, insert scripts, and update scripts to support ChitCore's transactional modules; ensuring all script changes are version-controlled via Bitbucket with proper push/pull workflows before deployment
- Performing T-SQL query analysis and optimization – including execution plan review, index tuning, and stored procedure refactoring – to improve report generation speed and reduce database load for 150+ active RDLC reports
- Raising and tracking all database tasks, script deployments, and bug fixes as Jira tickets; ensuring deliverables are completed within sprint deadlines and changes are documented for team visibility
- Leading and mentoring junior database engineers on T-SQL best practices, script version control using Bitbucket, data validation procedures, and UAT sign-off processes
- Conducting SQL code reviews on insert/update stored procedures and migration scripts before production release to maintain data integrity and prevent deployment errors

Software Engineer

Novac Technology Solutions

February 2024 – March 2026

Chennai, Tamil Nadu

- Executed MySQL-to-SQL Server and SQL-to-SQL database migrations using SSMA, successfully migrating 500+ tables and 10TB of production data with zero data loss and minimal downtime for enterprise clients
- Designed and deployed 15+ automated ETL pipelines using SSIS, reducing manual data processing time by 60% and improving data accuracy and consistency across business units
- Performed T-SQL query optimization, execution plan analysis, indexing strategy design, and stored procedure tuning, improving application performance by 40% and reducing average query execution time

- Conducted comprehensive data validation and UAT testing across development, QA, and UAT environments, ensuring data integrity standards were met on all migration deliverables before sign-off
- Managed all project tasks and script changes through Jira tickets; coordinated sprint deliverables with cross-functional teams to meet deadlines consistently
- Maintained and version-controlled all SQL insert scripts, update scripts, and stored procedure changes in Bitbucket using push/pull workflows, ensuring a clean and auditable change history
- Developed SSRS reports and Power BI dashboards with KPIs and drill-down visualizations, reducing manual reporting effort by 35% and delivering actionable business intelligence to senior stakeholders
- Collaborated with business analysts, QA engineers, and project managers to gather data requirements, design database schemas, and deliver migration solutions on schedule

Software Engineer Trainee

Novac Technology Solutions

February 2023 – February 2024

Chennai, Tamil Nadu

- Completed structured training in SQL Server, T-SQL programming, SSIS package development, and database design; transitioned to independent project contribution within 6 months
- Assisted senior engineers in data migration projects by performing data mapping, transformation logic, and post-migration validation testing to confirm data integrity
- Wrote and maintained SQL insert scripts and update scripts for data population and schema changes, submitting all changes through Bitbucket version control
- Created SSRS reports and conducted data analysis using Excel, contributing to monthly business intelligence deliverables for client reporting
- Logged tasks and tracked progress using Jira; participated in SQL script code reviews and adopted structured UAT validation practices under senior guidance

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Sethu Institute of Technology

2017 – 2021

Tamil Nadu, India

KEY PROJECTS & ACHIEVEMENTS

- **ChitCore – Chit Fund Management ERP (Live, May 2026):** Serving as the dedicated database and reporting engineer; designed and delivered 150+ RDLC reports across Customer, Agent, Branch, Group, Ticket, Chit, Legal, ROC Receipt, Receipt, and Ledger modules; authored and optimized all SQL stored procedures, insert/update scripts, and version-controlled deployments via Bitbucket
- **Enterprise Database Migration:** Migrated 500+ tables and 10TB of data from MySQL to SQL Server using SSMA with zero data loss, comprehensive data validation, schema mapping, and query performance tuning
- **Automated ETL Pipeline System:** Designed and deployed 15+ SSIS-based ETL workflows for daily data extraction, transformation, and loading across multiple business units, reducing manual effort by 60%
- **Query Optimization Initiative:** Refactored high-load stored procedures and redesigned indexing strategies across multiple client databases, achieving 40% improvement in application performance and faster query execution
- **BI Reporting Suite:** Built SSRS and Power BI dashboards with KPIs, drill-down reports, and trend analysis, reducing manual reporting effort by 35% for management stakeholders
